Office of the Chairman of the FCC  
Regarding action by CPUC - 310 & 909 area codes  
Fax: 202-418-3796

APR 15 2003

Federal Communications Commission  
Office of the Secretary

proposal:

The California public utilities commission (CPUC) is proposing to take away all wireless telephone numbers in the 909 and 310 area codes. These numbers would then be reassigned to landline customers, and new wireless numbers would be issued to those affected. Instead the FCC and CPUC can issue a new area code for cell phones and avoid causing disruption and inconvenience to 909 and 310 users.

Action to oppose this:

1. List the wireless phone numbers you have in the 909 and/or 310 area codes.
2. How would CPUC "taking" of these prefixes affect you?
3. Provide your name, address and fax # and you will receive acknowledgement from the FCC.
4. urge them to use the other option.

Dear FCC:

I oppose this action by the CPUC.

I have 2 wireless numbers in the 909 area code. For security reasons I will not list them here.

CPUC needs to proactively manage the land line and wireless business... not react in a way that will be very disruptive to existing customers.

My comment to the CPUC is quite simple "first come- first served!" Create another area code if need be for "NEW"

Customers, leave the existing wireless customers alone, and move on. Moving wireless customers

to another area code will be very disruptive to all existing (909 or 310) wireless customers... even the proposed "prefix" change mentioned above as a better solution is still going to be very disruptive for cell users.

Regards, Rob
